PROFILE

Information Technology student who works at the point where a project holds together: the schedule, the screens and the defects. Three team builds, three seats - running the project on a browser game, designing the interface on an evaluation platform, and owning quality assurance on a lost-and-found service.

PROJECT EXPERIENCE

Emberfall — 2026

Project Manager

- Led a student team through a full turn-based RPG build, from concept and scope to a playable public release.
- Divided the work across the team, tracked progress against the deadline, and decided what shipped and what was cut.
- Held the requirement that the game run properly on phones and tablets - touch layout, landscape and fullscreen - not only on desktop.

Evaluate CEC — 2026

UI/UX Designer

- One of the designers on a web platform replacing the paper teacher-evaluation process at Cebu Eastern College.
- Designed the evaluation flow end to end: registration by program, year level and section, through star ratings and optional anonymous comments to submission.
- Paced a long form so it stays completable, and contributed to the administrator dashboard covering ratings, program averages and sentiment.

FindIt — 2026

Tester / Quality Assurance

- Owned QA for a community lost-and-found platform covering Cebu, Manila, Davao and twenty more cities.
- Wrote and ran test cases across thirteen item categories, the search and the report flow.
- Concentrated on the claim path - proof submission, owner verification, and the ways a wrong claim could pass - then verified fixes and ran regression on desktop and mobile.

EDUCATION

BS Information Technology — Ongoing

- Coursework in software development, systems analysis and design, and collaborative project work.

Cebu Eastern College - Cebu City, Philippines

CORE SKILLS

Project Management
Scoping, task breakdown, scheduling, delegation, documentation, stand-ups

UI / UX Design
Wireframing, user flows, prototyping, design systems, usability

Quality Assurance
Test planning, test cases, bug reporting, regression, edge cases

TOOLS

- Figma
- Git & GitHub
- HTML, CSS, JavaScript
- Vercel
- Google Workspace

STRENGTHS

- Keeping a peer team aligned
- Turning dense workflows into usable screens
- Clear, reproducible defect reports
- Mobile-first thinking
- Finishing to a deadline

LANGUAGES

- English
- Filipino
- Cebuano
